

## PRESS RELEASE

---

### 30. FDBR-Expert-Meeting Pipelines: W-FILTER celebrates too!

**Speyer, March 2015** – W-FILTER was again well represented on the 30th FDBR-Expert-Meeting Pipeline Technology in Magdeburg from 24.-25. March 2015

The 30th birthday of the FDBR society pipeline technology coincides with the 35th anniversary of the company W-FILTER – strong reasons to celebrate! Since the establishment, the FDBR foundation makes a substantial contribution, that the technology competence in Germany is communicated, discussed and publicised in a dialogue between the companies active in the conduit manufacturing segment. The FDBR proves to be one of the leading meetings on the topic pipeline technology.

Also during this anniversary event twenty professional lectures have been presented: the contributions range from considerations on lessons learned such as examples on the scope of the European PED (Pressure Equipment Directive), the application of harmonized standards and directives. The conference was rounded off by a **trade exhibition**, where also the company W-FILTER presented their competence in regards to filter solutions.

„We are very pleased about the lively inflow of the public on our booth and the technical discussions with the qualified visitors who had been interested in the advantages of our strainers“, summarized Dirk Waldow the quality of the event, who is managing the company W-FILTER in second generation.

„Traditionally in the eastern part of Germany one can find the focus on district heating. Since the 90's our strainers are in service in the district heating network: in the transfer stations of Halle an der Saale, Frankfurt/Oder, Dresden, Finsterwalde and recently also in Dessau are our products nearly 25 years in application“, added the founder Guenter Waldow.

Learn more about the competence of W-FILTER in your future projects by increasing plant and energy efficiency.
